- Market organic waste reduction: **20-30t/d** (at 14 compost centres)
- Household organic waste reduction: **40-50t/d** (by 40,000 baskets)
- Others: **120-140t/d** ← Recycling

Session 1: Achievements of community-based solid waste management in Surabaya and other cities in Indonesia

Discussion points:

- How a community-based SWM model in Surabaya could be applied in other cities?
- What are the constraints?
- Roles of local governments.
- How to involve NGO, community groups and the private sector?
